

Duette® Honeycomb Shades

White Pine Approved Product: Hunter Douglas, Duette Architella 3/4" Pleat, Elan Streetside Backing.

Opaque (room darkening) or Semi-Opaque (light filtering) & Lifting System preferences available

As the originator of the honeycomb shade, Hunter Douglas offers superior quality, selection and style, with the widest array of fabrics, pleat sizes, colors and textures. Duette offers superior style and energy efficiency.

Product Offerings

Architella® ¾"cell-within-a-cell construction.

Fabric opacities:

- Semi-opaque – Diffused light and excellent privacy.
- Opaque fabrics – Blocks up to 99% of light for maximum privacy.

Product Advantages

- Front pleats carry the color. 8 colors of Architella Elan® have a neutral, streetside backing.
- Formed from 100% polyester fibers, offered in non-woven, elegant woven and metallic embossed fabrics. Requires minimal care. Fabrics are antistatic and inherently repel dust. Pleats stay firm and crisp for the lifetime of the product.
- TruePleat™ Construction. Select fabrics offer consistent pleating from the top to the bottom of shade. Smaller back or inner pleats ensure the front pleats maintain their shape even when lowered to their maximum height.

Environmental Benefits

Architella – The only honeycomb fabric in the industry that offers cells-within-a-cell. 3 insulating pockets on all fabrics which can reduce energy loss through windows.

Energy Efficiency & Protection

Duette honeycomb shades help block damaging sun rays, reduce heat/ cold loss and heat/cold gain, help lower utility bills and save valuable resources. Star Ratings listed from 1—6; the higher the rating the greater the protection. See Reference Guide for more details.

- **Solar Heat Control** – Architella Fabrics. 4 Stars ¾" Opaque & Semi-Opaque
- **Ultraviolet Protection** – All fabrics are 5 Stars
- **Insulation** – Architella Fabrics. 5 Stars – ¾" Opaque 4.5 Stars – ¾" Semi-Opaque

GREENGUARD® Certified

All Duette fabrics meet stringent indoor air quality guidelines to ensure healthier air quality within the home.

Operating Systems and Applications

The highest quality proprietary systems are used. All built with child safe features for peace of mind and protection of children and pets.

Care & Cleaning

Dusting, vacuuming, canned compressed air, spot-cleaning; bathtub immersion for some fabrics. See Reference Guide for details.

Limited Lifetime Warranty

Duette honeycomb shades are covered for defects in materials, workmanship or failure to operate for as long as the original purchaser owns the product. See Reference Guide for details.

American Design & Craftsmanship

Designed and custom-assembled in the United States to ensure superb quality, outstanding service and enduring style.

Operating Systems and Applications:

UltraGlide® Wand – Standard default operating system. Designer wand provides strength, flexibility and enhanced safety. Soft-touch coated for premium feel with teardrop-shaped tassel for ergonomic operation. Wand height must be specified at time of order. Widths up to 144". Will be on display in exercise room.

• **PowerView® Motorization** – Enhanced quieter motor. Battery powered using Pebble® or Surface Remote, or PowerView App for use with mobile devices. Widths up to 174".

• **LiteRise®** – No visible cords for the ultimate in child safety. With the touch of the hand, shades raise and lower using the exclusive contoured comfort-fit handle located on the moving rail(s). Height cannot exceed 84" and widths up to 144". Will be on display in exercise room.

• **Vertiglide™** – Vertical application operates from side-to-side; left, right, split or traveling center stack. Ideal for sliders and large windows. Maximum widths from 88" to 160" and 320" split stack depending on the fabric. Sydney III, in 25 colors, or Grandover™ valance available at no extra charge. PowerView Motorization available which can also be operated manually.

• **Sidelights** – Non-operable 4" to 117/8"; Cordless Operable 6" to 25"; Bottom-Up, Top-Down, or Top-Down/Bottom-Up.

• **EasyView® Arch** – Horizontal pleats; operable arch lowers from the top down.

• **SkyLift™** – Manual or PowerView skylight; sizes up to 144" x 144".

Hardware

• **Designer Headrail** – Replicates the honeycomb shape. Textured, matte finish for a soft, refined appearance. Flush mounted end caps for clean edges. Reduces stacking.

Design Options

- **Top-Down** – Single function shade lowers from the top down.
- **Top-Down/Bottom-Up** – Dual function shade lowers from the top down and also raises from the bottom up. Lower from the top for view providing privacy at the bottom of the window. Headrail light seal and magnetic closure helps eliminate light gap at the top. Will be on display in the exercise room.
- **Two-On-One Headrail** – Two independently operating shades
- **Standard Bottom-up** - Single function shade will be on display in exercise room

Approved Product Purchase Option Selkirk Glass & Cabinets is the preferred vendor for White Pine. As a Hunter Douglas Gallery, they provide on-site window covering consultation with each measure and installation is done by a full-time Certified Hunter Douglas installer who is familiar with White Pine windows and unique mounting requirements.
